There are many reasons why a cookie could not be set correctly. Below are the most common reasons:

- You have cookies disabled in your browser. You need to reset your browser to accept cookies or to ask you if you want to accept cookies.
- Your browser asks you whether you want to accept cookies and you declined. To accept cookies from this site, use the Back button and accept the cookie.
- Your browser does not support cookies. Try a different browser if you suspect this.
- The date on your computer is in the past. If your computer's clock shows a date before 1 Jan 1970, the browser will automatically forget the cookie. To fix this, set the correct time and date on your computer.
- You have installed an application that monitors or blocks cookies from being set. You must disable the application while logging in or check with your system administrator.

Why Does this Site Require Cookies?

This site uses cookies to improve performance by remembering that you are logged in when you go from page to page. To provide access without cookies would require the site to create a new session for every page you visit, which slows the system down to an unacceptable level.

What Gets Stored in a Cookie?

This site stores nothing other than an automatically generated session ID in the cookie; no other information is captured.

In general, only the information that you provide, or the choices you make while visiting a web site, can be stored in a cookie. For example, the site cannot determine your email name unless you choose to type it. Allowing a website to create a cookie does not give that or any other site access to the rest of your computer, and only the site that created the cookie can read it.

The Pan-American Highway is a network of roads stretching across the American continents and measuring about 30,000 kilometres (19,000 mi) in total length. Except for a rainforest break of approximately 160 km (100 mi), called the Darién Gap, the roads link almost all of the Pacific coastal countries of the Americas in a connected highway system. According to Guinness World Records, the Pan-American Highway is the world's longest "motorable road". However, because of the Darién Gap, it is not possible Pan-American Highway: Pan-American Highway, network of highways connecting North America and South America. Originally conceived in 1923 as a single route, the road grew to include a great number of designated highways in participating countries. The Inter-American Highway, from Nuevo Laredo, Mexico, to Panama City. The Mexican section was built and financed entirely by Mexico, while the sections through the smaller Central American countries were built with U.S. assistance. The whole system, extending from Alaska and Canada to Chile, Argentina, and Brazil, totals nearly 30,000 miles (48,000 km). In the early 21st century a portion about 50 miles (80 km) long, called the Darien Gap highway (located in Panama and Colombia), remained uncompleted. "Driving Pan-Americanism: The Imagination of a Gulf of Mexico Highway," The Journal of Latino-Latin American Studies 3:4 (Fall 2009-Spring 2010): 56-68. more. by J. Brian Freeman. This article examines the intertwined efforts of Mexican and Cuban officials, US policy makers and business interests, as well as tourists and tourism advocates, to link all three countries' highway systems around the Gulf of Mexico and more.
